

XCMG STORY

XCMG RECONDITIONED MACHINE

XCMG reconditioned machine is the second-hand machine program launched by XCMG for the post market. XCMG takes advantage of its dealer's network to collect the second-hand XCMG machine that falls into strict standards: good condition, full function and low service hours. The returned machine is then disassembled, repaired, painted, rebuilt and tested officially by XCMG, and the product life is therefore extended. The price of XCMG reconditioned machine is far lower than that of the new one, but its performance and safety are not compromised thanks to XCMG's state-of-the-art processes and technologies. In order to dispel customers' concerns, XCMG establishes a strict evaluation system for reconditioned machines and invites SGS to issue third-party certification.

OUR TEAM

150+ SPECIALISTS

150+ specialists participate in the reconditioning process.

Inspection Team
Certified professional assessors who have worked for more than 10 years on second-hand construction equipment and related machines.

Reconditioning and Repairing Team

RECONDITION PROCESSES

RECONDITION PROCESSES OF THE USED

We maintain a meticulous and rigorous attitude toward quality, focusing on extraordinary creativity, elaborate designs and exquisite craftsmanship.

COLLECTION
To collect the second-hand machines, XCMG sends its professional assessors to collect the second-hand machines. Only machines with high depreciation, low working hours and good condition can be collected.

INSPECTION
Certified professional assessors who have worked for more than 10 years on second-hand construction equipment and related machines. When the 200 items are checked and approved by SGS, standard reconditioning plan is then decided.

REPAIRING
In which every part to restore capacity. Replace all worn parts with genuine XCMG components.

TESTING
Perform the test procedures, ensure the performance and durability of the machine. Unqualified products are returned to step 1.

READY FOR DELIVERY
The machine is ready for delivery.

ISSUING REPORT
Certified assessor inspectors, both and certified the reconditioned machine. SGS provides the third-party inspection certificate.

PAINTING
The whole machine is repainted to restore its appearance, bright as new.
